Automotive - 24V Air Conditioners

## Sleeping Well Cube 24V

Sleeping Well is the world's first truck air conditioner that works even when the engine is not running, significantly reducing energy consumption.

Sleeping Well Cube is the first DC 24 Volt portable air-conditioning model with 950 W cooling power. It can be easily moved from one cab to another without incurring installation costs, making it ideal for fleets. Compact, lightweight and easy to use, already pre-charged. This model doesn't require installation (Plug&Play) or drilling of holes in the truck cab. Therefore, the hatch can be used without any problem. Sleeping Well Cube is also available in a 12V version for motorhomes and caravans.
